

# Probabilistic model checking

---

Tomaž Jonatan Leonardis, Janez Ignacij Jereb, Jožef Ilija, Sonja Šuković,  
Vanja Stojanović, Martin Žust

# Motivation

We want to model a probabilistic system and check its properties.

Examples include:

- Randomised distributed algorithms
- Communication, network and multimedia protocols
- Security protocols
- Biological systems
- Planning and synthesis
- Performance and reliability
- Game theory
- Power management
- ...

# How do we model a probabilistic system?

1. describe states and transitions
2. make number of state finite by abstraction
3. we assign probabilities to transitions

# Discrete-time Markov chains

# The Myriad of Models

- Discrete-time Markov chains
- Continuous-time Markov chains
- Markov decision processes
- Markov automata
- Probabilistic timed automata
- ...

# Differences between models?

Features:

- Discrete vs continuous time
- Nondeterminism
- Rewards
- intervals
- ...

## Continuous vs Discrete
